

CREA Control

Microencapsulation solution for
agricultural pest control

✦ Extends efficiency of active molecules

✦ Dedicated for foliar application (plant spray)

✦ Based on 100% agrobased materials

✦ Compatible with organic culture

CREA Control

To extend active molecules effect for pest control

Liquid form (aqueous dispersion)

Agrobased encapsulation matrix (vegetal waxes): 21%

Active molecule: 14%

Arabic gum: 5%

Water: 60%

Exists in
organic form

- Ready to use solution (dilution in water)
- 100% agrobased materials

Applications for traps and foliar spray

Traps to monitor insect pests

Blue/yellow sticky trap

Homemade trap

Industrial equipment

Pheromone trap

Light trap

Garden sprayer

For attractants, biocides, repellents

✦ Light sensitive molecules

✦ Volatile or not

- ✦ Pheromones
- ✦ Elicitors
- ✦ Natural toxins
- ✦ Biocides ...
