CREA Chem

To protect and release by mechanical action

Solid form (powder)

Aminoplast resin: 5-19%
Encapsulated compound: 75-80%
Water: 1-5%

Liquid form

Dispersion:
50% in water

- Protection during process, isolation from the environment
- For lipophilic or solid compounds
- From 5 to 30 µm

Applications examples

Erasable ink

Bitumen post-activation

Scent

Thermochromic and photochromic paint

Pre-activated adhesives
